TIPS FOR RIBBON DESIGN!

STEP 1:

CHOOSING A DESIGN

Choose images that are only 1 color
(It'll be easiest if your image has a white background)

Choose images & fonts with thick bold lines & spaces.
(thin lines wont print, and thin spaces will get filled in)

GOOD EXAMPLES:

GOOD FONT

STEP 2:

PUTTING THE DESIGN TOGETHER!

Standard ribbon size is 4"x1 5/8"
Standard Print size is 3.4" x .9"

I use Adobe Illustrator and Photoshop to design my ribons

You can also use Microsoft Word to design ribbons. See the video tutorial for details!

Fill the design box as much as possible
or your design will come out really small!

STEP 3:

SAVE YOUR DESIGN!

Save your design as a jpg.
If designing in word, use the snipping tool (PC) or
CMD+Shift+4 (mac) to take a screenshot

If you put a box around your design,
don't include that in the final saved file
(unless you want a box around your design on your ribbon)
